

Steeldeck 7.5

Practical • Professional • Affordable

Steeldeck 7.5 has the **highest load-rating of any modular staging system**.

It combines legendary strength with versatility and great value.

Of course, you can use it to build flat or raked stages, seating tiers or catwalks. It comes into its own when you need high-level, high-loading and high-value events on top because **it simply won't let you down**.

Steeldeck 7.5 is a **upgraded version** of the original system, first designed more than 20 years ago. The 7.5 in the name refers to the 7.5kN/m² loading - that's more than 2.2 tonnes on an 8'x4' deck.

The comprehensive Steeldeck 7.5 system also features something absolutely priceless - peace of mind.

| Technical Brief | |
|---------------------|-----------------------|
| Loading | 7.5 kN/m ² |
| Safe unbraced to | 1.5m |
| Stacking depth | 180mm |
| 8'x4' (birch top) | 69kg |
| 8'x4' (spruce top) | 55kg |
| 4'x4' (birch top) | 42kg |

18mm birch ply with matt black emulsion is standard
